Spray Wands

Use a Lever or Ball Valve Hose wand

Wands are available with our Pump kits or any hardware store
Pistol style wands will get sticky and won't shut off

Or Construct a "Light weight" WAND for larger pumps

1. Using a ¾ inch Aluminum broom handle – Or ½ inch Tiki Torch pipe.
2. Cut off ends of handle to use Shark Bite style connectors.
3. Cut short a 6 to 8 inch piece of handle off to use as a handle to valve.
4. Attach a Shark Style valve of your choice.
5. Attach remainder of broom stick (3' to 5' is a comfortable length)
6. Attach another Shark Bite connector to the wand to attach a 22 degree elbo
7. Attach a ½ " threaded 80-50 fan jet nozzle.

****Note -- (Galvanized pipe is too heavy and PVC and PEX pipe is to flimsy)***

Hawk Seale
Asphalt Rejuvenator and Preservative

Sprayer Tips and Boom Parts

As of 10-31-16hh rev c

- **Low -cost boom setups are available from HS or build your own with our plans on the following slides.**
- **80-20 -(2-GPM) Fan Jet Spray Tips for 12 -volt 5.5 and 7 GPM pumps- on 3-Ft or 5-Ft booms are $9.95 each with free shipping.**
- **80-50 -(5-GPM) Fan Jet Spray Tips for 12-volt 5.5 and 7 GPM pumps for a single wand or large booms using high volume trash or diaphragm pumps are -- $14.95 each with free shipping.**
- **Boom Kits are available from HS or you can use the parts list to build your own from slides 2 or 3.**
- **3- Ft & 5- FT Booms Kits with 12-Volt pumps with 4 and 6 spray tips will spray 4' or 6 ' widths**
- **Boom Kits and plans use ¼'"pipe fittings, all fittings are listed on the next slides**
- **Booms can also be constructed with ½ " or ¾" pipe**; smaller pipe has less dripping from tips when pump is turned off.
- **Two Boom Kits can be connected together or ran separately to spray wider 8 Ft to 12 Ft widths**
- **Kits include NPT to MGHT and FGHT garden hose adaptors for adapting to garden hose to and from the pump – and a ½" MGHT garden hose adaptor to connect a Wand to the boom are included.**
